Intuos

Intuos Pen & Touch
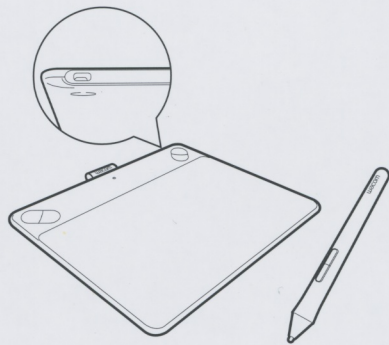

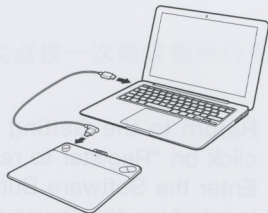

Touch on/off

Intuos Pen

Setting up Intuos

1. Connect to the Internet.

2. Close all open applications.

3. Connect the USB cable.
   - When you connect the cable, your computer will install a device driver to support your tablet.

4. Install the Wacom driver to ensure full functionality of your Intuos.
   - With an Internet connection (preferred method): Go to the Getting Started page for Intuos (www.wacom.com/getting-started/intuos). Click on "Download now."
   - Follow the prompts to install the driver on your computer.
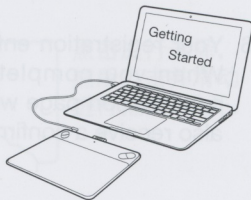

- Without an Internet connection: Run the installer from the Installation CD provided with your Intuos, and follow the prompts.
- When the driver installation is complete, your tablet is ready to use.
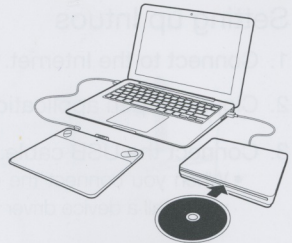

5. Return to the Getting Started page and click on "Register to redeem your offers." Enter the Software Bundle Download key located on the lower right corner of the Intuos box, then fill in the form on your screen.
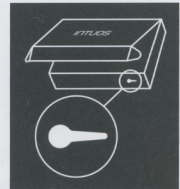

6. Your registration entitles you to free software to use with your Intuos. When you complete your registration, you will see a registration confirmation page with instructions for accessing the software. You will also receive a confirmation email.

Using the pen for navigation with Intuos
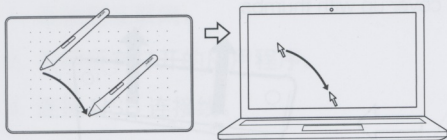

Move the pen slightly above the tablet, without touching the surface, to position the screen cursor.
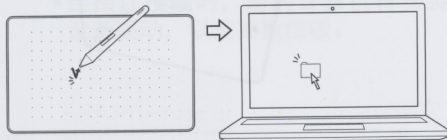

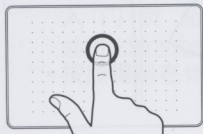

Tap the tablet once with the pen tip to select.

# Using multi-touch with Intuos (Only for Intuos Pen & Touch)

Some gestures are unique to the Wacom tablet. See the Wacom gesture guide available on the "Getting Started" website to learn more (www.wacom.com/getting-started/intuos).
