## Babies & Toddlers

### Summer Reading Challenge | Reading & Activity Log

**Welcome to the 2022 Summer Reading Challenge!** Lay the foundation for literacy by reading to your baby or toddler often and by practicing early literacy activities. For every 300 points logged, they will receive a prize.\* Earn 600 points to receive a book and be entered for grand prizes! Optional: Keep track of your reading and activity points at [cadl.org/summer](http://cadl.org/summer) and follow us on social media to learn about special drawings all summer long.

#### Early Literacy Begins With You!

Help your child get ready to read by engaging in early literacy activities.

As a public library we desire to support parents and caregivers in their efforts to develop early literacy skills in children from birth to age five by sharing the five early literacy practices with them every day.

**Talking**—to young children introduces them to new vocabulary. Ask open-ended questions to develop self-expression and stimulate brain development.

**Singing**—which also includes rhyming—helps a child develop language skills. Children can hear different sounds in words and enjoy practicing new sounds, so sing often together.

**Reading**—together, or shared reading, is the single most effective way to help your children become good readers. Nurture a love of reading in your child by reading together every day.

**Writing**—and reading go together. When children start practicing printing letters and drawing pictures, they are developing the coordination needed to write.

**Playing**—is one of the principal ways young children learn about their world. When children play, they put thoughts into words and talk about what they are doing.
