

Technology & Space Module

Encode Pack, Ages 8+

STEAM Academy offers an interdisciplinary approach that weaves together the science, technology, engineering, art, and math skills learned in the classroom and connects them to things kids see every day.

The goal of the Technology & Space Module is to build kids' fascination with the solutions of tomorrow and get them excited to look beyond the world they see today. Topics in this module include mechanics, astronomy, robotics, coding, and communication.

The apps, storybooks, and videos within this pack include:

- | | | | |
|-------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|
|  Cosmolander |  Solar Walk Lite - Planetarium |  Astronomy: NASA's Deep Space Exploration |  Did You Know?: Sun |
|  Fox Factory |  Solar Family |  Computer Science: The Importance of Coding |  Who Am I?: 3D Printer Technician |
|  Magnet Mayhem |  Thinkrolls 2 - Logic Puzzles |  Computer Science: The Impact of Computers |  Who Am I?: Astronaut |

This tablet is in the Technology & Space Module. For a well-rounded STEAM experience, explore other modules in this age group.
